

Enterprise Software Experts

ARCHITECTURE • INTEGRATION • SOFTWARE DEVELOPMENT

Senior Engineering & Architecture

FZN Labs brings **more than two decades of experience** in enterprise software development, technical architecture, middleware integration, high-performance APIs, and cloud platforms.

We help corporations and complex organizations design resilient systems, modernize legacy infrastructure, and structure consistent and scalable data flows to meet key business objectives.

Senior Technical Leadership

Hands-on technical direction with proven experience in highly demanding systems.

Integration & Engineering

End-to-end capabilities across APIs design, communication buses, and cloud modernization.

Quality-First Mindset

Maintainability, clean code, and architectural robustness in every delivery.

Consultative & Engineering Capabilities

ENTERPRISE ARCHITECTURE

- Solution architecture
- Distributed systems
- Cloud strategy & migration
- Microservices
- SOA & Modernization
- Senior technical leadership

INTEGRATION & APIS

- API Gateways & Proxies
- Cloud Integration (iPaaS)
- Middleware & Legacy
- Enterprise Service Bus (ESB)
- API lifecycle management
- WebServices, REST & gRPC

SOFTWARE ENGINEERING

- Fullstack development
- Java Enterprise engineering
- High-throughput APIs
- Backend development
- Robust applications
- Clean Architecture

CLOUD & DEVOPS

- AWS infrastructure
- CI/CD pipelines
- Orchestration (Kubernetes)
- GCP & Azure solutions
- Containerization (Docker)
- Process automation

Technologies & Platforms

LANGUAGES

Java TypeScript JavaScript

BACKEND & WEB

Spring Boot Node.js React Next.js

INTEGRATION (IPAAS/ESB)

iPaaS (Cloud Integration)
Enterprise Service Bus Message Brokers
Event-Driven Integration

API MANAGEMENT

API Gateways API Security (OAuth/OIDC)
API Lifecycle Management API Governance

CLOUD & DEVOPS

AWS GCP Azure Docker
Kubernetes CI/CD (Jenkins/Actions)

DATA & TOOLS

PostgreSQL MySQL MongoDB Git
Prometheus

Why Work With FZN Labs

An engineering approach built for critical systems.

We are not generalists. We focus exclusively on logical infrastructure, architecture, systems integration, and backend development with high corporate standards.

Enterprise Mindset

We design with operational complexity, regulatory security, and long-term scalability in mind.

Integration Experts

Our core specialty is connecting disparate systems—both modern and legacy—without friction.

Engineering Excellence

Clean architecture, robust continuous integration processes, and technical discipline to avoid technical debt.

True Strategic Partner

We operate transparently and integrate as a direct extension of your engineering team.

Let's Build Connected Systems

Talk to our senior architects and engineers about your challenges in integration, microservices migration, APIs, or technical modernization.

We design and implement the digital infrastructure needed to connect your business platforms.
